AI Coding Assistants

AI Coding Assistants

„Don‘t learn coding“

Nvidia CEO Jensen Huang has suggested that AI could soon make coding, a skill long conside red a fundamental aspect of computer science, redundant. In his view, the rise of AI will allo w people without traditional programming knowledge to easily develop complex programs.

AI Coding Assistants

What is it?

- AI designed to help developers write, debug, optimize code more efficiently
- Key features:
  - Code Autocompletion
  - Syntax and error checking
  - Code generation
  - Documentation
  - Refactoring
  - Multi-language support
  - Explaining the code

AI Coding Assistants

Available Assistants

- Github Copilot
- Tabnine
- OpenAI Codex (engine of Github Copilot)
- Cursor

AI Coding Assistants

Available Assistants

	GitHub Copilot	CURSOR
IDE	Multiple	Directly integreated in fork of VS code
Pricing	100$ / year	192$ / year
Models	Codex	GPT-4o, GPT-4, Claude 3.5 Sonnet, cursor-small
